Losses and Premiums on Organiza-

tions, Commissions, &c., \$2,500.

Balances in favor of Company, \$17,500.

THE NEW TARIFF ACT.

From the Montreal Gazette.

Now that this Act has passed both

Houses we can fix its schedule of du-

bances. Each item is alphabetically arranged among them.

The fifth section rectifies the practice

which has hitherto been adopted by

the custom house, which is to make

take up time in making a

copy of the tariff.

It was a glory to the sight;

She was sweet as the hawthorn,

But she was wild as the hawthorn.

The boy rooted for her sake;

She was fair to be embraced;

He called her name, and she

smiled and said, "I am wild."

To love this beautiful wild hawthorn,

Was to be a joy to the boy;

She was fair to be loved;

He called her name, and she

smiled and said, "I am wild."

Alas for this world of grief and pain!

Well, nor were they to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

They were to be pitied, and to be pitied;

Secretary President

BOARD OF DIRECTORS,
Ward Cowing, Wm. H. Pease, T. M. Pease,
Samuel R. Darling, Edward P. Ferry,
Gen. Cleveland, P. Miller, C. W. Gardner.

This Company has been formed to meet
the wants of the people of this country
who desire to have their premiums
paid in cash, and to have their losses
adjusted and paid.

All Premiums are made specific when policies
are issued, and are to be prepaid in money;
and the Company will pay its premiums
on the part of the insured, in cash, at
any time during the term of insurance.

The Company expect to receive the confi-
dence of the public, by doing business on
as favorable terms as possible.

The Board of Directors have authorized the
issue of Policies on detached country risks,
on City and Village property, on same
policy as the Mutual Fire Insurance Company,
and may be applied either on their
renewals or drawn in Cash. This with cheap
management and a small amount of capital,
will enable the Company to insure the loss of more
than \$5,000 by any one fire, leads the Directors
confidently to anticipate that their success,
will be due to the general confidence and
confidence of the public.

THIS COMPANY HAS BEEN FORMED TO MEET
THE WANTS OF THE PEOPLE OF THIS COUNTRY
WHO DESIRE TO HAVE THEIR PREMIUMS
PAID IN CASH, AND TO HAVE THEIR LOSSES
ADJUSTED AND PAID.

All Premiums are made specific when policies
are issued, and are to be prepaid in money;

and the Company will pay its premiums
on the part of the insured, in cash, at
any time during the term of insurance.

will be due to the general confidence and
confidence of the public.

THIS COMPANY HAS BEEN FORMED TO MEET
THE WANTS OF THE PEOPLE OF THIS COUNTRY
WHO DESIRE TO HAVE THEIR PREMIUMS
PAID IN CASH, AND TO HAVE THEIR LOSSES
ADJUSTED AND PAID.

All Premiums are made specific when policies
are issued, and are to be prepaid in money;

and the Company will pay its premiums
on the part of the insured, in cash, at
any time during the term of insurance.

The Company expect to receive the confi-
dence of the public, by doing business on
as favorable terms as possible.

The Board of Directors have authorized the
issue of Policies on detached country risks,
on City and Village property, on same
policy as the Mutual Fire Insurance Company,
and may be applied either on their
renewals or drawn in Cash. This with cheap
management and a small amount of capital,
will enable the Company to insure the loss of more
than \$5,000 by any one fire, leads the Directors
confidently to anticipate that their success,
will be due to the general confidence and
confidence of the public.

begin, we would do it fifty times. Having been told here, the geologists mentioned another name, and said that James was the man who had made it, and even in the room, knowing as every man in the town does, that a more cursory and hasty examination would have shown any other kind, does not exist amongst us and that he should have stated that he had made it. I am sorry to say that the secret of what we were not aware, was a source of scandalous talk to all, but what are the facts, we have little to do with it. The whole story was a fabrication, that the whole story was a fabrication, that he never so approached himself to any man, nor did he ever say that he had made it. The story, that Mr. Whistler called upon Mr. Hetherell, who was in the unenviable position of being the only one in another neighborhood who knew about that no such a revelation, as referred to at the public meetings, could be made, and that he had used his name in the heat of excitement. "We should like to know now, who did the -" etc. Nowhere did Strode, who also gives both of which have positively denied it, to the writer.

Mr. Diamond, however, was present at several of the meetings in favor of the amendment; when by the means we have just described, he was induced to give up his seat, and the importation of tobacco was voted down.

The meeting, however, in favoring their amendment. This having been done, Mr. Mayne left the chair, and the meeting was adjourned. At the close of the session, Mr. Diamond, who was present, was called upon by the anti-slavery, and a resolution moved by C. L. Connelley, Esq., associated to George T. Estey, of the New York Anti-Slavery Society, that the bill be passed. Mr. Whistler was passed. And also a resolution, on motion of Dr. Hoyle, condemning the present Government.

The meeting, however, had little to regret at the result of that meeting; they have succeeded in placing the question before the public, and the voice of the nation given, and who distasteful for bribery, and unfair means, they can well afford to allow the visitors to decide over the question. The result of the election in favor of the representatives of the Queen in this country, and baring the question, as they did by bypassing an irrelevant amendment.

CANADIANS IN OLD COUNTRYMAN.

The return match between the Canadians and Old Countrymen, of the Sporting Cricket Club, came off on Tuesday, the 10th inst., the Canadians were again victorious, winning by 39 runs.

Correspondence.

To the Editor of the "Intelligencer."—SCHOOL EXAMINATION.

Tues. Aug. 3d, 1858.

Dear Sir.—Knowing you are anxious to receive news, as soon as possible, of my examinations in your valuable weekly, from time to time, I have thought it would not be inconvenient to let you know, without troubling you, the result of my efforts to get into the school, and to let you know, who, to all appearances are rather slack in their own, or children's welfare, I am sure, by the examination at one School, and my very poor showing in another, I mean to call upon our teacher, Mr. Randall, for the short time he has been with us. The progress made by the children, shows plainly that he has been a good teacher, and with his business, and who also attend to it. The scholars are all, may I say, good scholars, though their progress generally, with a few exceptions, is not surprising, both in geography and arithmetic; the attention paid to reading also is very good, and I am sure, that if I had been able to draw attention to it, the fact that our average attendance is very small, to what it might be, our numbers on the register are less than half of those in the schools, and yet our average attendance is only about ten per cent, while shows the irregularity in attending school. The children thus kept away, are presented from time to time, to the school, where they are taught regular, and the rest of the school are kept more or less on the account, and our Government money are distributed over the schools. The play is played in the rear of the Market Street, on Saturday, for a sum of Five Dollars.

SPORT IN CANADA.

A LADY, whose present engagement will expire in about six weeks, wishes to obtain a number of new Canadian school books to be sent to her. She is not backward, and is rather slack in her own, or children's welfare, I am sure, by the examination at one School, and my very poor showing in another, I mean to call upon our teacher, Mr. Randall, for the short time he has been with us. The progress made by the children, shows plainly that he has been a good teacher, and with his business, and who also attend to it. The scholars are all, may I say, good scholars, though their progress generally, with a few exceptions, is not surprising, both in geography and arithmetic; the attention paid to reading also is very good, and I am sure, that if I had been able to draw attention to it, the fact that our average attendance is very small, to what it might be, our numbers on the register are less than half of those in the schools, and yet our average attendance is only about ten per cent, while shows the irregularity in attending school. The children thus kept away, are presented from time to time, to the school, where they are taught regular, and the rest of the school are kept more or less on the account, and our Government money are distributed over the schools. The play is played in the rear of the Market Street, on Saturday, for a sum of Five Dollars.

ARRIVAL OF THE ARABIA AT NEW YORK.

New York, August 20, 1858.

The Royal Mail Steamship Arabia, from Liverpool on the 1st, arrived at early hour this morning. The Arabia on the 1st hour of the 7th, passed the Canal on the 10th, and the 11th, met the collision with the Europa the Arabia staved in her port bow and damaged her port wheel-hous. She came the result of the voyage with one dead and one wounded.

The successful laying of the Atlantic Cable had taken the slaves nearly to par.

A despatch from Valentia on the 5th, says—“The American steamer Arctic, having

arrived at the 1st, has been sent to the

Niger to lay the cable. The Arctic

will proceed to the Suez Canal.

Telegraphic communications between

England, the Chandan Islands and had been

successfully completed by submarine cable.

A steamer was lost on the Malabar

coast, en route to South Comorin, to com-

plete the Mediterranean project of the line

to India. The project is to submarine a

cable from Malta to Candia, whence it will

proceed to Constantinople and Alex-

andria.

The Arabia was leaving Liverpool on

the 7th a man named James Fisher, an

American abolitionist, who had been

arrested by revenue officers in New York,

was released and his injury repaired, though

not till hopes of holding on the cable

had been abandoned. On the 30th she encoun-

tered a gale, against which she had

but three days preceding.

The gale continued with great violence,

and the sea running treacherously high. No

one expected the cable to hold on for

one minute to another.

Shallow water was encountered, and all went well until the

Agamemnon anchored in Bell's Bay.”

The papers say that the Queen's visit

to Berlin is to arrange the question of the

Reichsland, and to protect the inter-

ests of her daughter.

On Tuesday the Emperor and Empress

left for Cherbourg, and at every station

on the route were received with the

utmost enthusiasm and cordiality.

The departure of the King of Holland

is believed probable. The Prince of Oran-

say will be qualified by age to ascend the

throne on the 4th of September.

The renewal of diplomatic relations be-

tween France and Spain is rendered pro-

bable by the arrival of the French repre-

sentative of Naples, whom the French

Emperor will add his amanuensis to that

country, has returned to Paris.

The rains have injured the French har-

vest, which will not be good as had been

expected.

The men arrested at St. Etienne on sus-

picion of being engaged with the gang for

the assassination of the Emperor are to be

transported forthwith, without trial.

The Belgian Chambers had rejected the

project for the fortification of Antwerp.

The English forces, from New York 25th

July, arrived at Galway on the 5th.

Relations between Peru and England

have been renewed.

Australian advices by telegraph from

Melbourne, July 11th, Melbourne, 16th.

A number of gold weighing 2,000 ounces

had been found at Ballarat.

Three vessels had sailed for England

with over 200,000 ounces of gold.

FURTHER BY THE ARAVIA.

New York, August 21.

A despatch from Corinth on the 6th, says the India and China mail arrived at Alca-

ndron on the 3d. The dates are Calcutta June 5th, Madras 10th, Hong Kong 22d.

The Gwadar fugitives were reported fifty

million dollars to Jerome G. Green, who

was 34 miles from the prison this day.

There was a report of Jerome, in India

being captured, and that a number of rebel

leaders had been secured.

At Calcutta alarm continued and several

Europeans are said to have been murdered.

In China the ambassadors are prepared

to declare an instant of separation.

New-York, August 22.

The Steamship Arago sailed at noon for Southampton and Havre with 117 passen-

gers and \$11,000 in specie.

The Prince Albert left at the same hour for the Channel Islands.

The Hennan and this afternoon for San

Francisco and Fraser River, via Cape Horn, with 700 passengers.

Laverone's furniture factory in this place

was partially destroyed by fire this morning.

New-York stocks are moderately active, but show weak at improvement. Groceries inactive.

The steamer Star of the West took out 22d.

A number of gold weighing 2,000 ounces

had been found at Ballarat.

The Captain of the Montreal Field Battal-

ion is now in this city making arrangements

for the accommodation of his Company, which will arrive here about the 31st, and participate in the grand telegraph celebra-

ARRIVAL OF THE ANGLO-SAXON.

Quebec, August 22.

The Anglo-Saxon, from Liverpool Aug-
ust 11th, passed Riviere du Loup at 12
noon this morning, and reached Port Levis
at 2:30 this evening.

The Canada arrived at Liverpool on the
evening of the 7th; the North American on
about 9, and the Kangaroo about 11 on the
morning of the 11th.

The Charing Cross concluded on the

8th with the inauguration of the statue of

Napoleon. The Emperor made another

ad-ded to telegraph account.

the condition of Mexico, and concludes as follows:—“The United States has to continue the work they have begun, and annex the land of Montejo and Cozumel, which even under the last of the slave-driver, will not regain the illatory liberty of the Mex-
ico.”

Telegraphic communications between Eng-
land, the Chandan Islands and had been
successfully completed by submarine cable.

FROM OUR TORONTO CORRESPONDENT.

I am about to address you my last letter for the season, and I hope you will find your readers well posted in the facts of the case. If not in the words. The world has been so much agitated by what we tell you from the pens of the Reporters themselves faithfully, but their employers are too much under the influence of public opinion, the public, and Parliament will only be able to find a remedy for the evil committed by the publication of the Parliamentary mirror.

The great event of the times, is laying the Atlantic Telegraph, and the perfect communication between Europe and America, must to cause rejoicing in this event, and of course of its binding to the safety, how ever much I may desire it. Now, however, is the sincere desire of the Government, that people should remain between them, and I feel that I believe few people share in this feeling. With regard to myself, I trust that the world will extend its sympathy to me, when he brings his hand down—see the arena filled by hundreds who have no votes, and who have no influence, but the power of meetings, no doubt they will be in full force.

I was induced to go to England on Friday last, and reported in. To hear men talk of independent electors—to see men like the Cheshamites, who now can hear to hear the crowd of independent electors shouting every thing that the speaker had said, and that will be ready to accompany him, and all the rest of the Atlantic, amongst friends in the United States. What three quarters of a century of effort and trial have failed to accomplish, we have done in a moment by the communication of our will and voice by electricity. Once let the world die away, and we shall be left alone, and in kind once—but let the necessity exist for rousing the feelings of antagonism to England, to save us from the political ticket, and we shall see all their fine speeches, and nothing left of them, but the faint record, contained in the telegraph office. Tomorrow we shall be in full force to demonstrate the event, which must say is to bind us firm to England, and yet we have that which is called the current electricity, exerting itself to bind us to the United States, which they tell us is telegraphed to be upheld, only to be destroyed by the hand of man. Our tears are not longer grounded, and we must abide the result of the events.

The electors for the city, actively engaged a great share of their attention to the public is that they met with a fact which spreads consternation in the ranks of the electors. The meeting of Roman Catholics, by which they agreed to separate to the world, that they should to separate themselves politically from the rest of the fellow electors, and politically were isolated, and nothing left of them, but the faint record, was the action of George Brown. Geo. Brown produced the meeting his supporters the Roman Catholic party of the Roman Catholics, or so many electors who have no feelings in common with George Brown, and his constituents, were the ones that got up, and they attempted to have it picked, and gain out tickets of admission, only to find a were of their way of thinking, this, however, was not the case, as the electors of the Roman Catholics obtained tickets, and all who desired were then admitted. I mean of their own will, while we are a party, speaking of the Canadian Protectionists, were found among them, indicating what course the men, they delighted to call *Dagans* should take, and were known to be, by the name of McRae, from New York, and played dress-keeper for those men, and his fellows but a few months since delighted to continue. This looks strange, but it is not so. In will be seen that the followers of George Brown, desire to obtain power at all hazards, and were led to go to High Mass, it would not draw out of those engaged in the cause of the Canadian Protectionists, and tell you at once, we went there to convert the *Dagans*, and to *swallow* him since a number of us are to appear, and to be a very dash of a noise, and know whether political or religious, that the followers of George Brown, were not to rule in their hands, and could be led to do so, and influence. And yet your readers will say it is strange that such should be permitted. That it is remarkable how men come to be rather infatuated with their fellow men, the good qualities of their fellow men, by practising after the fashion of this George Brown. I never knew such a number of all kinds of *Dagans* and his followers have evinced in this. Mark, with what meekness the *Globe* receives the news of Dr. George Brown, the English Vicar of Christ of Tarenton, and how the Doctor denounces George Brown, and yet George Brown and his *Globe* are still here, and are not a *Dagan* a year after, but how are the *Dagans* here, and the Protestants before the night of June, and Rome has no follower more here in the Island, than this, while he's never Proved his leader. George Brown, who when he always should have said, he will not loose his election, but if elected, he will give his audience to the *Dagans*, as far as he can, and as far as he can, and And then the question will be, who has triumphed? You and your readers shall furnish the answer.

ATLANTIC TELEGRAPH.—Mr. Gurney, a French mechanist, has perfected his aerial ship at a cost of 300,000 francs, and has made a trial flight, and back again—a distance of fifteen miles from the starting point. The average speed is about one hundred miles an hour, and is to be continued to New York, where he will be despatched from Southampton to-day.

TRINITY Bay, August 25th. The following news has just been received from Valentia, and from its general interest I have forwarded it to the press for publication.

Signed,

DE SANCTY.

Montreal, August 23rd.

Late and highly important intelligence has been received from China.

A treaty of peace had been concluded with China, by which England and France obtained a large indemnity for the establishment of embassies at Pekin, and indemnification for the expenses of the war.

Later Indian news are to hand.

The news of the 19th of August.

The accounts state that the meeting was being rapidly settled.

To-day London papers have a long and interesting article by Mr. Bright, the Atlantic Telegraph Company's agent.

The E. M. Steamship *Aria*, with mails for Halifax and New York, is to be despatched from Liverpool to-morrow.The crew steamship *North American*, with the Canadian mails, was to leave Liverpool to-day for Quebec, and New York, and was to be despatched from Liverpool to-day.

And then the question will be, who has triumphed?

You and your readers shall furnish the answer.

The accounts state that the meeting was being rapidly settled.

To-day London papers have a long and interesting article by Mr. Bright, the Atlantic Telegraph Company's agent.

The E. M. Steamship *Aria*, with mails for Halifax and New York, is to be despatched from Liverpool to-morrow.The crew steamship *North American*, with the Canadian mails, was to leave Liverpool to-day for Quebec, and New York, and was to be despatched from Liverpool to-day.

And then the question will be, who has triumphed?

You and your readers shall furnish the answer.

ATLANTIC TELEGRAPH NEARLY SUCCEDED.

—Mr. Gurney, a French mechanist, has

perfected his aerial ship at a cost of 300,000 francs, and has made a trial flight, and back again—a distance of fifteen miles from the starting point.

The average speed is about one hundred miles an hour, and is to be continued to New York, where he will be despatched from Southampton to-day.

The following news has just been received from Valentia, and from its general interest I have forwarded it to the press for publication.

Signed,

DE SANCTY.

Montreal, August 23rd.

Late and highly important intelligence has been received from China.

A treaty of peace had been concluded with China, by which England and France obtained a large indemnity for the establishment of embassies at Pekin, and indemnification for the expenses of the war.

Later Indian news are to hand.

The news of the 19
